TOOLS & SKILLS

Data Science

- Python
- Clojure
- R
- Machine learning
- Statistical modeling
- Feature extraction
- Classification & regression
- Supervised & unsupervised
- Natural language processing
- Predictive analytics
- Data visualization
- Amazon Sagemaker & Quicksight
- MLOps
- MLFlow
- MongoDB
- Azure ML
- PostgreSQL
- Git & Github

Software Engineering

- Agile software development
- Test-driven development
- Refactoring
- Pair programming/mobbing
- Azure DevOps
- Kubernetes
- Docker
- AWS/Azure
- Jira
- Elasticsearch
- ETL

EDUCATION

Georgia Institute of Technology, *MS in Analytics, Computational Data Analytics Track*

2023-Present

Emory University, *BS in Neuroscience and Behavioral Biology, BA in Religion*

2014-2018

EXPERIENCE

Health Data Analyst

LMI, Medicare Advantage Analysis Team

08-2023-

Present

Data Scientist

OneStudyTeam, a member of the Reify Health family

07-2022 -

12-2022

- Developed analytics and reporting related to site use and engagement on the OneStudyTeam platform.
- Built and maintained Python and dbt (SQL) data analysis pipelines for self-service dashboards, reducing the number of ad hoc data requests from internal stakeholders.
- Implemented analytical projects such as statistical KPI assessment and anomaly detection using time series methods.
- Worked with healthcare data in compliance with the data accountability standards of HIPAA and GDPR.
- Collaborated with internal customer, product, sales, and marketing teams.

Data Scientist

ATA, LLC, The Full Stack Data Science Company

03-2020 -

06-2022

- Implemented the following analytical projects in Python:
 - Data-driven geospatial risk-analysis algorithm using Bayesian statistics, arriving at patented product
 - Suite of machine learning and statistical anomaly detection algorithms for use in streaming data systems
 - Ensemble of deep learning and classical machine learning for regression problems in logistics
 - Natural Language Processing and use of medical ontologies for text navigation
- Served as both a tech lead and team member in the design and implementation of full-stack data-intensive applications (in Clojure) to put the above data science solutions into production.
- Applied machine learning operations (MLOps) to production systems, including the development, testing, deployment, and management of model services.
- Developed RESTful APIs in Clojure for complex data integration, processing data from public and licensed datasets, storing in relational and document-oriented databases, and preparing for use by company user interfaces.
- Communicated analytical methods and results to technical and non-technical clients and stakeholders.

Research Fellow

National Institutes of Health, National Center for Complementary and Integrative Health

05-2018 -

03-2020

Bethesda, MD

- Built pipelines in R and Python for analysis of behavioral and physiological data (fMRI, autonomic).
- Managed Electronic Health Records and clinical data.
- Facilitated patient visits and consulted with patients on study procedures.

- Designed data visualizations and prepared manuscripts for publication in peer reviewed journals.
- Collaborated with a diverse research team; prepared written and verbal reports for multidisciplinary audiences.

PROJECTS [more at michaelmccall.com](https://michaelmccall.com)

Finding Topic Clusters in Tech News ([GitHub](#))

01-2020

NIH Foundation for Advanced Education in the Sciences, Bioinformatics and Data Science

Bethesda, MD

- Web-scraped 1,500 tech news articles, applied NLP techniques such as lemmatization and vectorization, and trained a KMeans unsupervised algorithm to cluster articles based on content.

Exploring Patient Satisfaction and Readmission in Medically Underserved Areas ([GitHub](#))

09-2019

NIH Foundation for Advanced Education in the Sciences, Bioinformatics and Data Science

Bethesda, MD

- Munged data from multiple API queries, totalling over 2400 rows, and visualized factor relationships using Python.

Using Supervised Learning to Classify Drug Consumption Behavior ([GitHub](#))

11-2018

NIH Foundation for Advanced Education in the Sciences, Bioinformatics and Data Science

Bethesda, MD

- Trained Logistic Regression, random forest, and SVC models on survey data to predict drug use using Python.

PUBLICATIONS

Case, L. K., Madian, N., **McCall, M. V.**, Bradson, M., Liljencrantz, J., Goldstein, B., Alasha, V., Zimmerman, M. (2023) β -CT Affective Touch: Touch Pleasantness Ratings for Gentle Stroking and Deep Pressure Exhibit Dependence on A-Fibers. *eNeuro*, 10(5), ENEURO.0504-22.2023. <https://doi.org/10.1523/ENEURO.0504-22.2023>.

Case, L. K., Liljencrantz, J., **McCall, M. V.**, Bradson, M., Necaie, A., Tubbs, J., ... & Bushnell, M. C. (2021). Pleasant deep pressure: expanding the social touch hypothesis. *Neuroscience*, 464, 3-11. <https://doi.org/10.1016/j.neuroscience.2020.07.050>.

- Processed and statistically analyzed fMRI data using Python and FSL; prepared visualizations for manuscript.

McCall, M. V., Riva-Posse, P., Garlow, S. J., Mayberg, H. S., & Crowell, A. L. (2020). Analyzing non-verbal behavior throughout recovery in a sample of depressed patients receiving deep brain stimulation. *Neurology, Psychiatry and Brain Research*, 37, 33-40. <https://doi.org/10.1016/j.npbr.2020.05.002>.

- Designed project, collected, and analyzed behavioral data in R using Factor Analysis, Analysis of Variance, and Regression.

Case, L. K., Liljencrantz, J., Madian, N., Necaie, A., Tubbs, J., **McCall, M.**, ... & Chesler, A. T. (2021). Innocuous pressure sensation requires A-type afferents but not functional PIEZO2 channels in humans. *Nature communications*, 12.1, 1-10. <https://doi.org/10.1038/s41467-021-20939-5>.
